

Real Estate Property Management System

A modern web platform for discovering, saving, and scheduling visits to properties

B.TECH ACADEMIC PROJECT

V VISHWA TEJA — 2520090033

B SREE NIKHIL — 2520090058

CH VIHAMSH — 2520090090

The Challenge

Problem Statement

01 — Property Discovery Is Difficult

Finding suitable properties requires searching through scattered information, making comparison inconvenient and time-consuming.

02 — Managing Favorite Properties Is Difficult

Users may find multiple properties but need an easy way to save and access properties they are interested in later.

03 — Property Visit Scheduling Is Inconvenient

Users need a simple way to schedule property visits and keep track of upcoming visits without relying on manual communication.

Proposed Solution

EstateLy provides a centralized web-based real-estate platform where users can:

- Browse, search, and filter available properties
- View detailed property information
- Save properties to a personal Wishlist
- Schedule and track property visits
- Manage their account through a personal dashboard

User Journey:

Key Features

User Features

- Browse and search available properties
- Filter by location and property type
- View price, bedrooms, bathrooms, and area
- Detailed property information pages
- Save properties to personal Wishlist
- Contact the property agent directly
- Schedule property visits
- View upcoming and past visits
- Track previously viewed properties

System / Admin-Side Capabilities

- Property data management through backend
- User registration and secure login
- Database-connected Wishlist management
- Database-connected visit scheduling
- Property view tracking
- User and property data stored in MySQL

System Architecture

Technology Layers

	Frontend React.js, React Router, Lucide React, CSS
	Backend Node.js, Express.js, REST APIs
	Database MySQL, MySQL Workbench
	Tools VS Code, Git & GitHub, Postman

Expected Outcome & Future Scope

Expected Outcomes

- Simplified property discovery and comparison
- Centralized Wishlist management
- Convenient property visit scheduling
- Better visibility of upcoming visits
- Centralized storage of user and property data
- Improved overall buyer experience

Future Scope

- Online
